## **DETAILED ACTION**

The following is a first action on the merits of application serial no. 10/717,894 filed on November 21, 2003.

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

The information disclosure statements filed on November 21, 2003 and April 16, 2004 have been acknowledged.

### ***Drawings***

Figure 8 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

The abstract of the disclosure is objected to because in line 11, after “revolution”, “torque” should be changed to --speed--. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities:

-On page 6, last line and on page 7, line 22 of paragraph [0013], after “revolution”, “torque” should be changed to --speed--.

Appropriate correction is required.

***Claim Objections***

Claims 1, 4, 6, 13 and 14 are objected to because of the following informalities:

-In claims 1, line 24, claim 13, line 21 and claim 14, line 21, after “revolution”, “torque” should be changed to --speed--.

-In claim 4, line 11, after “revolution speed control”, it seems as if the language used in lines 4-6 starting with “so that an” should be inserted.

-In claim 6, line 12, after “torque control”, it seems as if the language used in lines 4-6 starting with “so that an” should be inserted. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3681

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claims 1, 3, 5, 7, 8, 13 and 14, it is unclear as to what the term "saturated" is referring to, it seems that the limitations after this term in claims 9 and 10 try to clarify it, but as to the claims above, the term alone is indefinite.

As to claim 2, the use of the lever diagram structure as a limitation is indefinite due to the diagram being an actual imaginary graph for plotting the components of the transmission sequence. Patentable weight can't be given to something that is not a physical component and/or activity to the operation of the transmission. Incorporation by reference to a specific figure or table is permitted only in exceptional circumstances where there is no practical way to define the invention in words and where it is more concise to incorporate by reference than duplicating a drawing or table into the claim.

(MPEP 2173.05(s))

#### ***Allowable Subject Matter***

Claims 1-14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

#### **FACSIMILE TRANSMISSION**

Submission of your response by facsimile transmission is encouraged. Group 3600's facsimile number is **(703) 872-9326 before final and 703-872-9327 after final**. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission,

Art Unit: 3681

see MPEP 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check.

Responses submitted by facsimile transmission should include a Certificate of Transmission (MPEP 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to  
the Patent and Trademark Office (Fax No. (703) 000-0000) on \_\_\_\_\_ (Date)

Typed or printed name of person signing this certificate:

---

---

(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and MPEP 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
